engineering-i.com will provide a unique input.output analysis for engineering, bio-engineering and medical data analysis through the medium of the Internet.
engineering-i.com is using WDIE(™)(woodie), the Wireless Data Input Engine.
It is the answer to increasing demands of engineers, bio-medical students and the medical profession for full cell-phone, wireless card, wired Modem to broadband communication.
Enter WDIE COREDES(™)
Enter WDIE(™) MEDICAL
Enter COREDES Modem/DSL

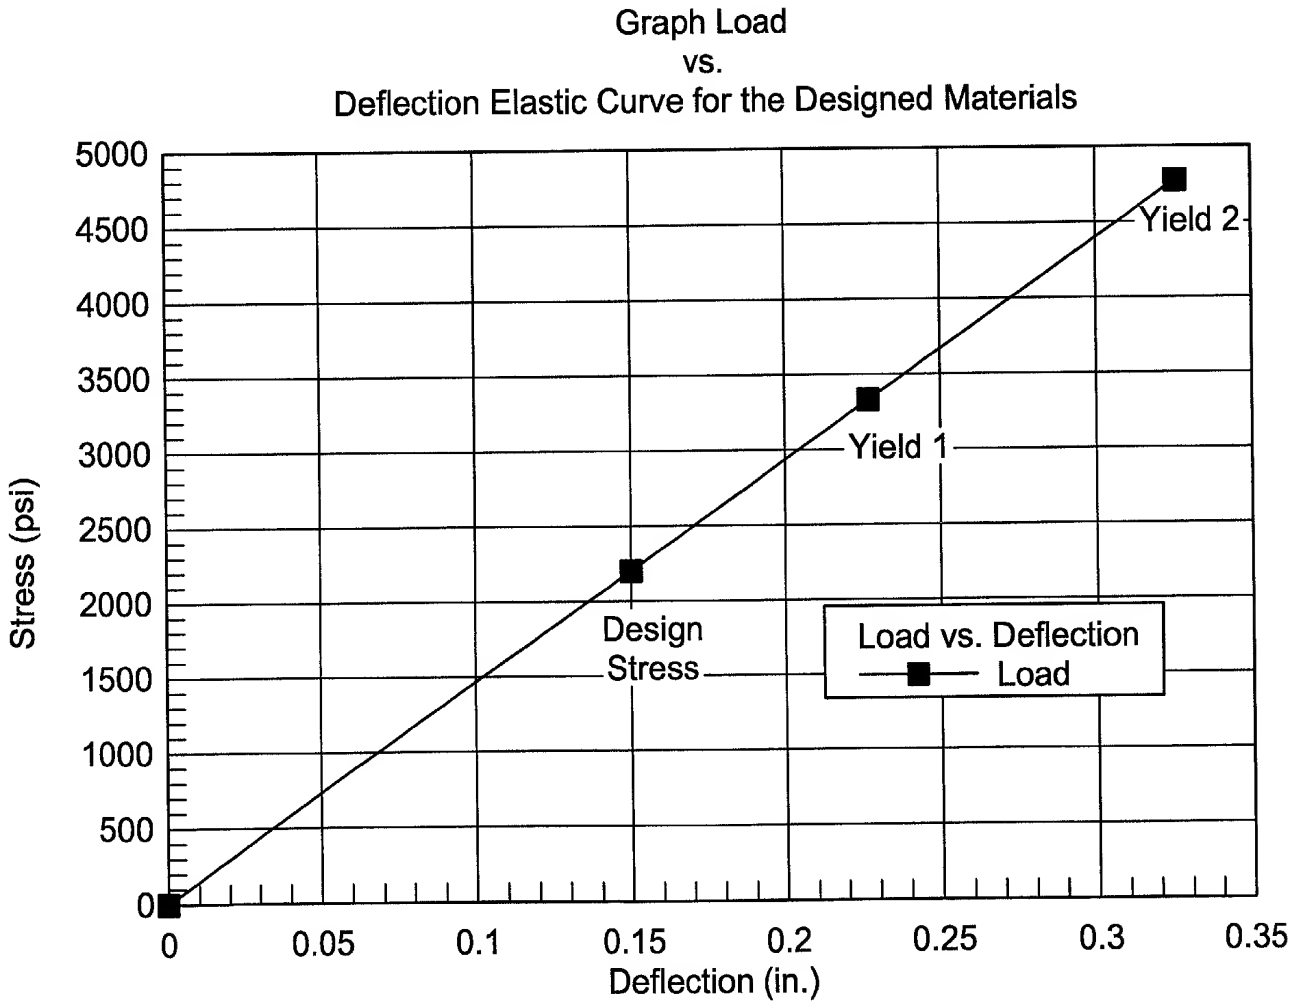
Fig. 10



Note: Yield 1 is the primary stress limit, Yield 2 is the limit of the design regime.
The Design stress has a Factor of Safety of 2.22 on stress at Yield 2.
